

Title	Thesaurus Management Software (D12.5)
Work Package	12
Authors	Ken Miller, UKDA programming team
Source	UKDA thesaurus software, UKDA thesaurus team WP4 documents
Date	December 2009
Dissemination Level	Researcher view of thesaurus (PU) Translator and Administrator views (RE)

D12.5 was developed at the UK Data Archive and based on its in-house thesaurus management system.

The content of the thesaurus, using the general view is accessible from:
<http://elsst.esds.ac.uk/>

The system is live and linked into the UK Data Archive's HASSET thesaurus, the source for ELSST. Lower level access to the management system would permit changes to the thesaurus itself. To ensure the integrity of both the source and the multilingual thesauri, access is by request to: beedh@essex.ac.uk.
