

Title	End User Licence and Trans-border access documents (D3.8)
Work Package	WP3
Authors	The UK Data Archive
Source	Online multi-level access model used in the UK
Dissemination Level	PU (Public)

Summary/abstract

D3.8 comprises three files with notes and licences relating to the deposit of data in an archive and allowing their exchange across borders. There is an assumption that the majority of data that will be deposited are anonymised public use files but D3.8b also allows for the deposit of data with some level of sensitivity.

File D3.8a is a set of notes to accompany File D3.8b which is the Option 1 licence for deposit of data with an archive.

D3.8c is a proposed licence for open access data.

The documents have been left in draft form to enable further discussion between the ERIC funders, data producers and archives.
